

Client Meeting Notes #5.5 (May 16)

Aims

- Show the first prototype to the Anna and Rebecca
 - Get feedback from them
-

Chat Log

- Anna and Rebecca are in the meeting
- Nat gives a quick summary of the progress (*of where we're up to*) to Rebecca
- Anna asks about our experience with Dart/Flutter
 - Our approach was self-tutorial and documentation
- Saacha gives a quick summary of the different interfaces that we have
- Saacha gives a walkthrough for the training modules
 - We unveil the text-to-speech function in this meeting (*inside the view screens*) [this is a new function, additional one that we wanted to implement]
 - Iste suggests we can send a video recording of the TTS in order to hear it properly
 - Rebecca thinks that it's cool (*the training modules*)
- Zainab gives a walkthrough for the support interface
 - We show the authentication section in this meeting (*wasn't working in the previous meeting*)
 - We also unveil the search function [this is a new function, additional one that we wanted to implement]
 - We show the revamped evaluation functionality, session table (*taken from the notes that Hiraani wanted from the previous session*)
 - Rebecca asks a question about the difference between judgement can the recent feedback
 - Zainab gives an example to answer her question (*goes through creating an evaluation, leading to a new session created*)
 - Iste gives a bit of context based on the evaluation keys (*what V stands for etc.*)
 - Mentions that we're working on a drop-down list to organise all of the task notes, will be organised from the most recent
 - Rebecca also likes the support interface
- Iste gives a walkthrough for the admin interface
 - Gives disclaimer about using the support log-in that it'll be fixed for the final product

- Bit of an error working through the log-in because of the new addition of the authentication process
- Adds a trainee for demonstration purposes (*istefat sawda*)
- Waits for Anna to come back, she had to step aside for a bit, continues when she comes back
- Gives demo for the different functionalities for trainees
- Shows the archive feature based on Hiraani's notes about the app from the last meeting
- Zainab mentions about organising the trainee list and modifying the interface to indicate whether the trainee is archived or not
- Mentions about updating the code to allow the function to handle the test case of only having instructions for the tasks/recipes without needing an image
- Mentions we need to fix the overflow for the images
- Iste asks about Rebecca's thoughts about the app
 - Rebecca says we did a great job
- Rebecca's thoughts
 - Mentions it's phenomenal
 - Easy-to-use, ticks all of the boxes (*being a repo and a way to track the progress*)
 - Query: Entries are numbered, mentions that we could have a timestamp in the sessions (*for the support worker and how to help the trainee improve*)
- Nat brings up about the IT Team for Te Tuhi Cafe
 - Rebecca does not know at the moment
 - If we can't ask Hiraani, we can Rebecca if ever
 - Will ultimately be Hiraani's IT Team
- Anna's thoughts
 - Good team dynamics
 - Was proud when she was hearing Rebecca's praises about the app
